## Product highlights

### Welcome message

A welcome greeting is displayed each time the TV set is switched on.

### Integrated DVB-T tuner

The integrated DVB-T tuner lets you receive Digital Terrestrial TV channels, next to the existing analog channels. It also allows guests to listen to digital radio stations in high quality sound without the extra investment in radio receivers.

### Digital Crystal Clear

Digital Crystal Clear is a processing technology that digitally adjusts and enhances picture quality by optimizing contrast, color and sharpness levels, resulting in more vivid cinema-like images.

### Swivel stand

This LCD TV comes with a swivel stand that allows your guests to adjust the TV so that they can watch TV from any position in the room. The stand can be secured to a table or furniture to provide additional security against theft.

### SmartLoader

Provides the ability to copy TV settings and analog channel programming from one TV set to other TV sets in less than a minute. The feature ensures uniformity between TV sets and significantly reduces installation time and costs.

### Installation menu locking

Prevents unauthorized access to installation and configuration settings, to ensure maximum guest convenience and avoid unnecessary reprogramming costs.

### VESA mounting

A unified industry standard for wall/ceiling mounting equipment set by the Video Electronics Standards Association. This offers a great flexibility in mounting possibilities and a wide choice of mounting brackets.

### Green Logo

Philips awards the Green logo to our most environmentally friendly and safe products, so that you can rest assured that you are making the right environmental choice. The hardware of this Hospitality TV is based on a consumer TV model, which has been certified by external auditors to be (more than) at least 10% more energy efficient than other products on the market in that product category. Better energy efficiency not only reduces environmental impact but also lowers operating costs (see [www.philips.com/sustainability](http://www.philips.com/sustainability))

### Eco-friendly design

Sustainability is integral to the way Philips does business. Philips TVs are designed and produced according to our EcoDesign principles aimed at minimizing overall environmental impact, through lower power consumption, removal of hazardous substances, lower weight, more efficient packaging and better recyclability. Philips TVs also have a special housing of flame retardant material. Independent tests carried out by emergency fire services have shown that whereas TVs can sometimes intensify fires caused by external sources, Philips TVs will not contribute to the fire.
